

How long should I expect to be in the Emergency Department?

The time it takes to get your test results depends on the type of test:

- Blood and urine tests: 2 hours
- CT scan: 2 hours
- EKG results: 10 minutes
- Ultrasound: 2 hours
- X-ray: 1 - 1.5 hours

These are average times and may vary depending on a number of factors. If you have questions or concerns, please ask your health care team.

Appointment Line: (910) 735-8864
